Art Unit: 3724

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 2-8, drawn to a table saw having an arc-shaped sliding path, classified in class 83, subclass 471.1.
- II. Claim 9, drawn to a table saw having a blade protecting unit, classified in class 83, subclass 478.
- III. Claim 10, drawn to a table saw having a biasing member, classified in class 83, subclass 582.

2. Claim 1 will be examined with the election of any group. Claim 1 links the inventions of groups I-III. The restriction requirement of the linked inventions is subject to the nonallowance of the linking claim, claim 1. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Art Unit: 3724

3. The inventions are distinct, each from the other because the inventions of groups I-III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. For example, the table saw of group I could be employed without the blade protecting unit of group II, and conversely, the table saw of group II could be employed with a linear slot, unlike the arcuate slot of group I. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
